

BIBLIOGRAPHY

Publications of J. L. Doob

1932

- [1] The boundary values of analytic functions. *Trans. Amer. Math. Soc.* **34** 153–170.
- [2] On a theorem of Gross and Iverson. *Ann. of Math.* **33** 753–757.

1933

- [3] Systems of algebraic difference equations (with J. F. Ritt). *Amer. J. Math.* **55** 505–514.

1934

- [4] The boundary values of analytic functions II. *Trans. Amer. Math. Soc.* **35** 418–451.
- [5] Stochastic processes and statistics. *Proc. Natl. Acad. Sci. USA* **20** 376–379.
- [6] On analytic functions with positive imaginary parts (with B. O. Koopman). *Bull. Amer. Math. Soc.* **40** 601–605.
- [7] Probability and statistics. *Trans. Amer. Math. Soc.* **36** 759–775.

1935

- [8] The limiting distributions of certain statistics. *Ann. Math. Statist.* **6** 160–169.
- [9] The ranges of analytic functions. *Ann. of Math.* **36** 117–126.

1936

- [10] Note on probability. *Ann. of Math.* **37** 363–367.
- [11] Statistical estimation. *Trans. Amer. Math. Soc.* **39** 410–421.

Received February 2009.

This is an electronic reprint of the original article published by the Institute of Mathematical Statistics in *The Annals of Probability*, 2009, Vol. 37, No. 5, 1671–1678. This reprint differs from the original in pagination and typographic detail.

1937

- [12] Stochastic processes depending on a continuous parameter. *Trans. Amer. Math. Soc.* **42** 107–140.

1938

- [13] Stochastic processes with an integral-valued parameter. *Trans. Amer. Math. Soc.* **44** 87–150.
- [14] One-parameter families of transformations. *Duke Math. J.* **4** 752–774.

1940

- [15] On two formulations of the theory of stochastic processes depending upon a continuous parameter (with W. Ambrose). *Ann. of Math.* **41** 737–745.
- [16] Regularity properties of certain families of chance variables. *Trans. Amer. Math. Soc.* **47** 455–486.
- [17] The law of large numbers for continuous stochastic processes. *Duke Math. J.* **6** 290–306.

1941

- [18] Probability as measure. *Ann. Math. Statist.* **12** 206–214.
- [19] Discussion of papers on probability theory (with R. V. Mises). *Ann. Math. Statist.* **12** 215–217.
- [20] A minimum problem in the theory of analytic functions. *Duke Math. J.* **8** 413–424.

1942

- [21] The Brownian movement and stochastic equations. *Ann. of Math.* **43** 351–369.
- [22] Topics in the theory of Markoff chains. *Trans. Amer. Math. Soc.* **52** 37–64.
- [23] What is a stochastic process? *Amer. Math. Monthly* **49** 648–653.

1943

- [24] On the spectral analysis of a certain transformation (with R. A. Leibler). *Amer. J. Math.* **65** 263–272.

1944

- [25] The elementary Gaussian processes. *Ann. Math. Statist.* **15** 229–282.

1945

- [26] Markoff chains—denumerable case. *Trans. Amer. Math. Soc.* **58** 455–473.

1947

- [27] Probability in function space. *Bull. Amer. Math. Soc.* **53** 15–30.

1948

- [28] On a problem of Marczewski. *Colloq. Math.* **1** 216–217.
 [29] Renewal theory from the point of view of the theory of probability. *Trans. Amer. Math. Soc.* **63** 422–438.
 [30] Asymptotic properties of Markoff transition probabilities. *Trans. Amer. Math. Soc.* **63** 393–421.

1949

- [31] Application of the theory of martingales. In *Le Calcul des Probabilités et ses Applications. Colloques Internationaux du Centre National de la Recherche Scientifique* **13** 23–27. Centre National de la Recherche Scientifique, Paris.
 [32] Heuristic approach to the Kolmogorov–Smirnov theorems. *Ann. Math. Statist.* **20** 393–403.
 [33] Time series and harmonic analysis. In *Proc. Berkeley Symp. Math. Statist. and Probab. (Berkeley, 1945, 1946)* 303–343. Univ. California Press, Berkeley, CA.

1951

- [34] Continuous parameter martingales. In *Proc. Second Berkeley Symp. on Math. Statist. and Probab. (Berkeley, 1950)* 269–277. Univ. California Press, Berkeley, CA.

1952

- [35] The measure-theoretic setting of probability theory. *Ann. Soc. Polon. Math.* **25** 199–209.

1953

- [36] *Stochastic Processes*. Wiley, New York.

1954

- [37] Semimartingales and subharmonic functions. *Trans. Amer. Math. Soc.* **77** 86–121.

- [38] *Limit Distributions for Sums of Independent Random Variables*. (Appendix I in Gnedenko–Kolmogorov.) Addison-Wesley, Cambridge, MA.
- [39] Present state and future prospects of stochastic process theory. In *Proc. Internat. Congr. of Math. (Amsterdam, 1954)* **3** 348–355. North-Holland, Amsterdam.
- [40] Interrelations between Brownian motion and potential theory. In *Proc. Internat. Congr. of Math. (Amsterdam, 1954)* **3** 202–204. North-Holland, Amsterdam.

1955

- [41] Martingales and one-dimensional diffusion. *Trans. Amer. Math. Soc.* **78** 168–208.
- [42] A probability approach to the heat equation. *Trans. Amer. Math. Soc.* **80** 216–280.

1956

- [43] Probability methods applied to the first boundary value problem. In *Proc. Third Berkeley Symp. Math. Statist. Prob. (Berkeley, 1954–1955)* **2** 49–80. Univ. California Press, Berkeley, CA.

1957

- [44] La théorie des probabilités et le premier problème des fonctions frontières. *Publ. Inst. Statistique Univ. Paris* **6** 289–290.
- [45] Conditional Brownian motion and the boundary limits of harmonic functions. *Bull. Soc. Math. France* **85** 431–458.
- [46] Brownian motion on a Green space. *Teor. Veroyatnost. i Primenen.* **2** 3–33.
- [47] A new look at the first boundary value problem. In *Proceedings of Symposia in Applied Mathematics, Vol. VII* 21–33. McGraw Hill, New York. (For the Amer. Math. Soc., Providence, RI.)

1958

- [48] Boundary limit theorems for a half-space. *J. Math. Pures Appl.* **37** 385–392.
- [49] Probability theory and the first boundary value problem. *Illinois J. Math.* **2** 19–36.

1959

- [50] A Markov chain theorem. In *Probability and Statistics: The Harald Cramér Volume* (Ulf Grenander, ed.) 50–57. Almqvist and Wiksell, Stockholm.
- [51] Discrete potential theory and boundaries. *J. Math. Mech.* **8** 433–458; erratum 993.

- [52] A relativized Fatou theorem. *Proc. Natl. Acad. Sci. USA* **45** 215–222.
- [53] A non-probabilistic proof of the relative Fatou theorem. *Ann. Inst. Fourier (Grenoble)* **9** 293–300.

1960

- [54] Applications of boundary theory to sums of independent random variables (with J. L. Snell and R. E. Williamson). In *Contributions to Probability and Statistics: Essays in Honor of Harold Hotelling* (I. Olkin, S. G. Ghurye, W. Hoeffding, W. G. Madow and H. B. Mann, eds.) 182–197. Stanford Univ. Press, Stanford, CA.
- [55] Some problems concerning the consistency of mathematical models. In *Information and Decision Processes* 27–33. McGraw Hill, New York.
- [56] Relative limit theorems in analysis. *J. Anal. Math.* **8** 289–306.
- [57] A relative limit theorem for parabolic functions. In *Trans. Second Prague Conf. on Information Theory Statist. Decision Functions, and Random Proc.* 61–70. Publishing House Czechoslovak Acad. Sci., Prague.

1961

- [58] Conformally invariant cluster value theory. *Illinois J. Math.* **5** 521–549.
- [59] Notes on martingale theory. In *Proc. Fourth Berkeley Symp. Math. Statist. Prob. (Berkeley, 1960)* **2** 95–102. Univ. California Press, Berkeley, CA.
- [60] Appreciation of Khinchin. In *Proc. Fourth Berkeley Symp. Math. Statist. Prob. (Berkeley, 1960)* **2** 17–20. Univ. California Press, Berkeley, CA.

1962

- [61] Boundary properties of functions with finite Dirichlet integrals. *Ann. Inst. Fourier (Grenoble)* **12** 573–621.

1963

- [62] Cluster values of sequences of analytic functions. *Sankhyā Ser. A* **25** 137–148.
- [63] A ratio operator limit theorem. *Z. Wahrsch. Verw. Gebiete* **1** 288–294.
- [64] One-sided cluster-value theorems. *Proc. London Math. Soc.* **13** 461–470.
- [65] Limites angulaires et limites fines (with M. Brelot). *Ann. Inst. Fourier (Grenoble)* **13** 395–415.

1965

- [66] Some classical function theory theorems and their modern versions. *Ann. Inst. Fourier (Grenoble)* **15** 113–136. Errata **17** (1967) 469.

- [67] Fields, optionality and measurability (with K. L. Chung). *Amer. J. Math.* **87** 397–424.

1966

- [68] Applications to analysis of a topological definition of smallness of a set. *Bull. Amer. Math. Soc.* **72** 579–600.
 [69] Wiener’s work in probability theory. *Bull. Amer. Math. Soc.* **72** 69–72.
 [70] Remarks on the boundary limits of harmonic functions. *SIAM J. Numer. Anal.* **3** 229–235.

1967

- [71] Applications of a generalized F. Riesz inequality. *Rev. Roumaine Math. Pures Appl.* **12** 1185–1191.

1968

- [72] Compactification of the discrete state space of a Markov process. *Z. Wahrsch. Verw. Gebiete* **10** 236–251.
 [73] Generalized sweeping-out and probability. *J. Funct. Anal.* **2** 207–225.

1969

- [74] An application of stochastic process separability. *Enseign. Math.* **15** 101–105.

1970

- [75] Contribution to the Herman Wold Festschrift. In *Scientists at Work* (T. Dalenius, G. Karlsson and S. Malmquist, eds.) 38–39. Almqvist and Wikells, Uppsala.
 [76] State spaces for Markov chains. *Trans. Amer. Math. Soc.* **149** 279–305.
 [77] Stochastic processes determined by families of continuous functions. In *Proc. Internat. Conf. Funct. Anal. Related Topics (Tokyo, 1969)* 378–382. Univ. Tokyo Press, Tokyo.
 [78] Separability and measurable processes. *J. Fac. Sci. Univ. Tokyo* **17** 297–304.

1971

- [79] What is a martingale? *Amer. Math. Monthly* **78** 451–463.

1972

- [80] The structure of a Markov chain. In *Proc. Sixth Berkeley Symp. Math. Statist. Prob. (Berkeley, 1970)* **3** 131–141. Univ. California Press, Berkeley, CA.

- [81] William Feller and twentieth century probability. In *Proc. Sixth Berkeley Symp. Math. Statist. Prob. (Berkeley, 1970)* **2** xv–xx. Univ. California Press, Berkeley, CA.

1973

- [82] An inequality useful in martingale theory. *Sankhyā Ser. A* **35** 1–4.
 [83] Boundary approach filters for analytic functions. *Ann. Inst. Fourier (Grenoble)* **23** 187–213.
 [84] What are martingales? *Wiadom. Mat.* **16** 37–50.

1975

- [85] Stochastic process measurability conditions. *Ann. Inst. Fourier (Grenoble)* **25** 163–176.
 [86] Analytic sets and stochastic processes. In *Statistical Inference and Related Topics, Proceedings of a Meeting Held at Indiana Univ. in Bloomington, Indiana, 1974* (Madan Lal Puri, ed.) **1** 1–12. Academic Press, New York.

1976

- [87] Foundations of probability theory and its influence on the theory of statistics. In *On the History of Statistics and Probability, (Proc. Symp. to Celebrate the Bicentennial of USA Held at Southern Methodist Univ., 1974)* (D. B. Owen, ed.) 197–204. Marcel Dekker, New York.

1977
